

CHEW CARDS

What's Out There? Effective Pest Detection

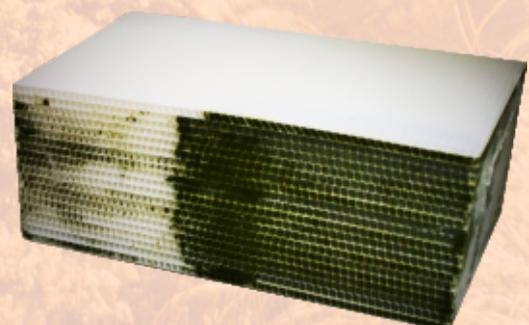

Product Forms

- Packs of 20 cards filled with Ferafeed 213 "Special Blend" paste.
- Packs of 5 unfilled cards.

Product Features

- Chew cards are an innovative one-of-a-kind product used to detect the presence of a range of small mammals including rats, mice, stoats, cats, possums and hedgehogs.
- Unique bite or tooth mark impressions left behind on the Chew Card accurately indicate just what animal you are dealing with.
- Cards are filled with Ferafeed 213- a non-toxic and highly palatable formulation.
- For domestic use as well as for professional pest control operations.
- Easy and ready to use- just fold in half and nail onto a tree or fence post.
- Used by the Department of Conservation and other leading pest controllers and conservationists.
- Weather resistant.
- Also available unfilled — simply fill with peanut butter to effectively attract small pests.
