

# D-BLOCK

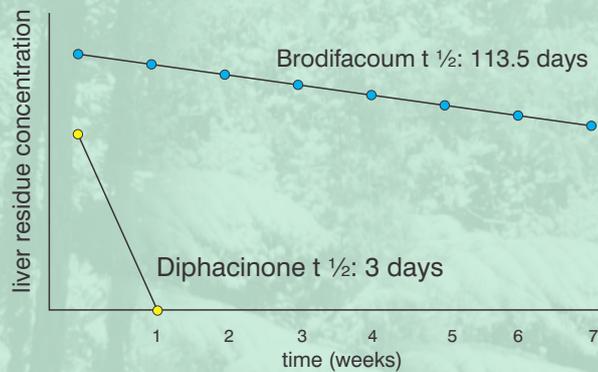

## Effective Rodent Control

### Product Features

- D-Block is made with the superior Connovation formulation — proven to be the first choice by rats.
- Each hard block bait is triangular and weighs 28 grams.
- Made with the active ingredient Diphacinone — specially chosen for its minimal impact on the environment, making it ideal for environmentally conscious users.

### Anticoagulant Residue Graph

t<sub>1/2</sub> is the time taken for the toxin to lose half its strength.

- Used by the Department of Conservation and other leading conservationists and pest controllers.
- Suitable for indoor and outdoor use in bait stations.
- To prevent bait caching, a hole through the centre of each block allows for the bait to be easily secured onto internal bait station spikes, wired, nailed or tied into place.
- Antidote readily available.

PRODUCT	CODE	QUANTITY	PRICE
