

FERACOL

Vitamin D3 Pest Control

Product Forms

- Paste in pails for use in permanent or fixed bait stations.
- Paste in Feracol Striker bait stations.

Product Features

- Feracol paste is a high quality and cost effective form of pest control that targets both possums and rats.
- Highly palatable to target animals.
- Made with the active ingredient Vitamin D3 or Cholecalciferol, a naturally occurring vitamin that is toxic when used in high doses.
- Biodegradable with no persistent residues.

Water resistant- remaining palatable for up to two months in the field.

- Environmentally responsible, no secondary kills- minimal risk to native birds and other non-target species.
- Safe to handle.
- No license required

Feracol — Striker Product Features

- Feracol Striker is a ready to use potato starch bait station filled with 18 grams of Feracol paste. The Bait station is glued to a card for ease of attachment and dipped in wax to provide weather and handling protection.
- This specially formulated biodegradable bait station completely breaks down in the field over a matter of weeks after interaction with pests, and is ideal where permanent bait stations are not required or needed.
- The card is stapled/nailed to trees or other suitable surfaces.
