

PREDASTOP

EFFECTIVE PASTE BAIT FOR STOAT AND FERAL CAT CONTROL

Product Features

- A paste designed to be placed into minced meat and applied into tunnels.
- Biodegradable. Rapidly breaks down within the body of the animal; carcasses do not remain toxic and therefore are non-persistent in other livestock.
- Low toxicity to most bird species and very low risk of secondary poisoning.
- Humane - PAPP's toxic effects are related to its ability to reduce the red blood cells ability to carry oxygen. The onset of symptoms is rapid and stoats and cats are usually unconscious within 45 minutes.
- You must hold a Controlled Substance Licence.
- Predastop is significantly less than the cost of traditional stoat trap based control operations and will also complement existing stoat and feral cat control programs.
- Safe for operators to use; an effective antidote called Methylene blue is available.

PAPP	CODE	UNIT	DOSES	PRICE	PRICE per Animal
STOATS					
x1 Syringe	RC315-4	2.2g	61	35.00	0.57
x2 Syringes	RC315-5	4.4g	122	65.00	0.53
x10 Syringes	RC315-6	22.0g	610	225.00	0.37
x1 Pottle	RC315-7	4.0g	114	70.00	0.61
FERAL CATS					
x1 Syringe	RC317-1	2.2g	11	35.00	3.18
x2 Syringes	RC317-2	4.4g	22	65.00	2.95
