Prices exclude GST and freight

Products Forms

- Paste in pails for use in permanent or fixed bait stations.
- Paste in RatAbate Striker bait stations.

Paste Product Features

- Highly palatable paste — trials show rats prefer RatAbate over other products on the market.
- Used by the Department of Conservation and other leading conservationists and pest controllers.
- Contains the active ingredient Diphacinone which has a short life and low risk of secondary poisoning — making it ideal for environmentally conscious users.
- Antidote readily available.

RatAbate Striker — Product Features

- RatAbate Striker is a ready to use potato starch bait station filled with 18 grams of RatAbate paste. The Bait station is glued to a card for ease of attachment and dipped in wax to provide weather and handling protection.
- This specially formulated biodegradable bait station completely breaks down in the field over a matter of weeks after interaction with pests, and is ideal where permanent bait stations are not required or needed.
- The card is stapled/nailed to trees or other suitable surfaces.
